**Algebra as a Civil Right**

**Robert Moses, Ph.D.**

In his young adult life, Dr. Moses was a pivotal organizer for the civil rights movement. Today, Dr. Moses serves as the founder and president of the Algebra Project Inc., which he began while pursuing his doctorate of Philosophy at Harvard University. He argues that mathematics literacy is as important to educational access and citizenship today as was the right to vote to political access and citizenship in the 1960s.
